<function Model.make predict function.<locals>.predict function at
0x7fe57567e560> triggered tf.function retracing. Tracing is
expensive and the excessive number of tracings could be due to (1)
creating @tf.function repeatedly in a loop, (2) passing tensors
with different shapes, (3) passing Python objects instead of
tensors. For (1), please define your @tf.function outside of the
loop. For (2), @tf.function has reduce retracing=True option that
can avoid unnecessary retracing. For (3), please refer to
https://www.tensorflow.org/guide/function#controlling retracing
and https://www.tensorflow.org/api docs/python/tf/function for
more details.\n"

            "WARNING:tensorflow:6 out of the last 6 calls to
<function Model.make_predict function.<locals>.predict function at
0x7fe554fe83b0> triggered tf.function retracing. Tracing is
expensive and the excessive number of tracings could be due to (1)
creating @tf.function repeatedly in a loop, (2) passing tensors
with different shapes, (3) passing Python objects instead of
tensors. For (1), please define your @tf.function outside of the
loop. For (2), @tf.function has reduce retracing=True option that
can avoid unnecessary retracing. For (3), please refer to
https://www.tensorflow.org/guide/function#controlling retracing
and https://www.tensorflow.org/api docs/python/tf/function for
more details.\n"
